Data Scientist with a strong foundation in machine learning and deep learning, experienced in designing and deploying data-driven solutions that transform complex data into actionable insights. Skilled in predictive modeling, statistical analysis, and data visualization with proficiency in Python and SQL. Hands-on experience with frameworks such as Scikit-learn, TensorFlow, PyTorch, and XGBoost, applied in projects including customer segmentation, predictive analytics, and Retrieval-Augmented Generation (RAG) systems for intelligent information retrieval. Passionate about leveraging data to drive innovation, optimize decision-making, and deliver measurable business impact.

Education

Cairo University

Sep 2022 – Jul 2026

Computers and Artificial Intelligence | Data Science

Work Experience

Machine Learning & AI Engineer – trainee

Jul 2026 – Present

FlyRank

- Participating in the Applied Search Intelligence internship program.
- Building machine learning solutions using real-world search and content data.
- Applying data analysis and AI techniques to solve practical business problems.
- Developing reproducible workflows, research notebooks, and ML models in line with industry best practices.

Data Scientist – trainee

Jul 2025 – Aug 2025

Paysky

- Completed a data science internship at **Paysky**, focusing on customer segmentation and marketing analytics.
- Built and optimized **data pipelines** and developed **machine learning models** for clustering and prediction.
- Integrated insights into **interactive dashboards** using FastAPI and React.
- Designed and implemented a **Retrieval-Augmented Generation (RAG) system** to load files, analyze data, and answer user queries, supporting automated decision-making.
- Gained hands-on experience with **SQL Server, Docker, and modern AI frameworks**.

Data Scientist – trainee

Jul 2025, Sep (1 week) 2025

Commercial International Bank – CIB

- Completed a **two-phase internship** at **CIB**.
- **Phase 1:** Attended online sessions covering banking operations, financial services, data-driven practices, and insights into product innovation for enhancing banking solutions.
- **Phase 2:** Participated in an on-site rotation, collaborating with the **customer service department** and cross-functional teams.

- Gained practical exposure to **banking workflows, teamwork, and client-focused problem solving.**

Machine Learning Engineer – trainee

Jun 2024 – Oct 2024

Digital Egypt Pioneers Initiative – DEPI

Statistics and Linear Algebra Basics Data Science with Python Developed machine learning models for prediction Azure AI Fundamentals and Azure AI Engineer Associate MLOps Tools, MLflow, and Hugging Face Build Basic Generative Adversarial Networks GANs Natural Language Processing with Attention Models.

Machine Learning Engineer – trainee

Apr 2024 – Jun 2024

GDSC Cairo University

Cleaned and preprocessed data Conducted statistical tests for decision support Developed machine learning models for prediction Predict fake or real news using NLP

Core Skills

Statistics and mathematics

Data visualization
